Simple Steps for Getting Your Project Started

Thinking about remodeling a living area, such as a kitchen or bath, can be overwhelming, especially if you think of it as one big project. Instead, approach your project in small pieces. We are here to guide you every step of the way. The first step in the process is creating a very rough drawing of your current space. Simply follow these steps:

1. Gather your tools—Use the guide on page 2 and grid paper on page 3, a pencil and eraser, and a measuring tape.
2. Measure your room. Start in one corner and measure the wall. Record all measurements in inches. Draw each wall on the grid paper and write in the inches.
3. Draw in doors and windows. Indicate which way they swing open. When measuring windows and doors, please include the trim as part of your measurement. For instance, a 3" trim on one side of the window, plus a 30" window, plus a 3" trim on the other side of the window, equals a 36" window. Draw in any other breaks in the walls.
4. After you have measured and recorded each wall and its measurement in inches on your grid, measure and roughly draw in each item against each wall on the grid. For instance, there may be an appliance or a grouping of cabinets.
5. Write down the ceiling height of your room.
6. Make a notation of all existing appliance dimensions.

Bring your drawing into our Design Center to work with your designer one-on-one. (We do suggest making an appointment so that your designer can dedicate plenty of time with you. Of course, you are always welcome to drop-in as well.) The drawing you've created is simply a starting point. Once you decide to select products and reach a more detailed stage in design planning, your designer will come to your home to do a professional measure. This initial rough drawing will simply help your designer get a sense of your space so the more detailed work of creating your dream room can begin!

Your Capitol Group Designer: _____

Designer's e-mail address: _____

Designer's direct phone number: _____

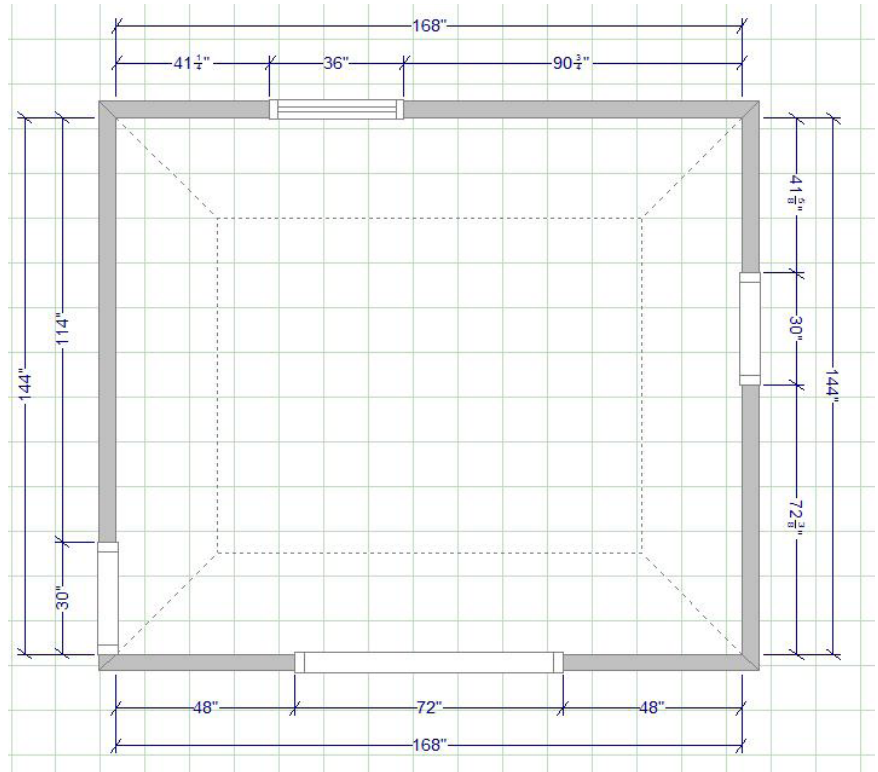

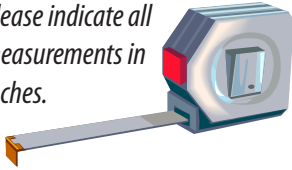

Designer's (typical) showroom hours: _____

The difference is our designers!

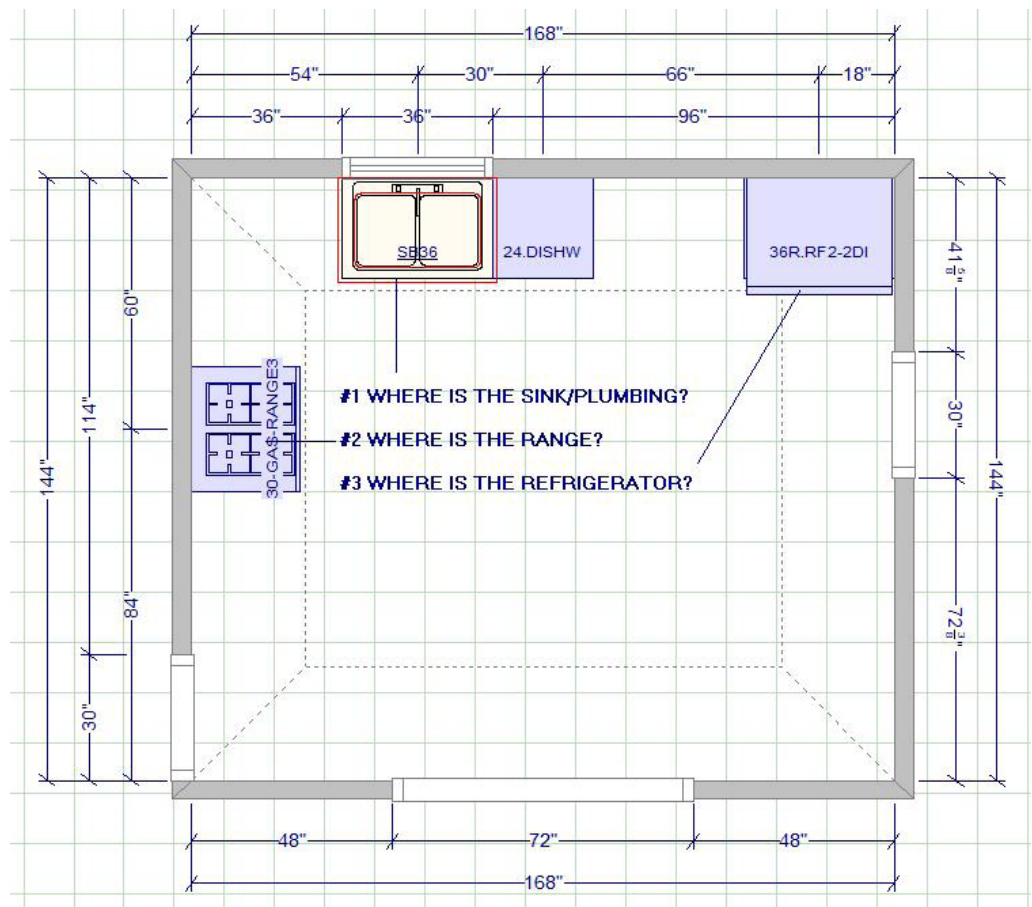

How to Create a Rough Drawing of Your Current Space

Step 1: Measure the walls, doors, & windows.

Please indicate all measurements in inches.

Step 2: Add the locations and measurements for your appliances to your drawing.
